## Objectives:

- To promote an international platform for scientific and institutional dialogue that integrates education, sustainability, health, the environment, and social justice, strengthening collaboration among researchers, educators, public administrators, and civil society in developing innovative and inclusive solutions aligned with the Sustainable Development Goals of the 2030 Agenda.
- To foster the exchange of knowledge and experiences among researchers, educators, public administrators, and social leaders on issues related to education, sustainability, health, the environment, and social justice.
- To stimulate international academic and institutional cooperation, strengthening networks for research, innovation, and sustainable development among institutions in Brazil and other countries.
- To encourage the integration between education and the Sustainable Development Goals (SDGs) by promoting pedagogical practices and educational initiatives aimed at developing responsible and sustainability-oriented citizens.
- To recognize and promote local and regional initiatives in education and sustainability, giving visibility to projects developed by schools, universities, and civil society organizations.
- To strengthen the role of education as a transformative force for social change by encouraging the development of innovative and inclusive solutions to contemporary challenges related to sustainability and social justice.
